Technical Specification of the Software

Annexure- 1

Technical specifications

Sl. No.	Parameters	Specification
1.	**ENVI Mini Lab (10 users) Perpetual License**	ENVI Basic is a professional remote sensing and image analysis software package designed for the processing, visualization, and interpretation of optical satellite and aerial imagery. It offers tools such as image preprocessing, classification, orthorectification, multispectral and hyperspectral image analysis, feature extraction and change detection. It provides the essential tools required for geoinformatics laboratory exercise and research applications in geospatial data analysis.
2.	**ENVI SARSCAPE Basic (1 user)**	ENVI SARSCAPE is an add on tool which allows to process and analyze SAR data for application like structural mapping, surface deformation monitoring, land use land cover change monitoring etc. It supports the analysis of microwave data for structural, geomorphology and hydrological application and integration of the derived information with other geospatial product.
