NIT Durgapur

The history of the Institute dates back to 1960 when by an act of the parliament, Regional Engineering College was founded at Durgapur. The college received a major recognition in 2003 when it was elevated to National Institute of Technology (NIT) as a “deemed university”. NIT Durgapur is the first institute in Eastern India to be selected as a Lead Institute under the Technical Education Quality Improvement Program (TEQIP) of the Govt. Of India funded by the World Bank. In 2007, the institute received a final feather to its cap when the Union Government of India declared it as an “Institute of National Importance”. The rapid shift of focus to research has also resulted in the steep rise in the research output indicators (journal and conference papers) and sponsored projects. Currently the Institute offers nine four-year BTech and nineteen MTech programs, three MSc programs, one MCA, one MBA and PhD programs by all departments.

Department of Electronics & Communication Engineering

The embryonic formation of the Department of Electronics and Communication Engineering was in the year 1983 with the introduction of an undergraduate course. Apart from the four years BTech course the department also offers two full time MTech courses, one in Telecommunication Engineering and other in Microelectronics and VLSI. The department also offers PhD in several areas. There are significant number of registered full-time and part-time research scholars presently carrying out PhD under supervision of faculties. A large number of PhD has been already produced by the department. The research strength has been reflected by the quality publications of the department. Faculties of the department are involved in outreach activities by organizing several short-term courses, workshops and also have academic collaborations with the universities in and outside India.

Dr. R. Das
Dr. N. Biswas
and
all Research
Scholars of ECE Department

Purpose

The 4th Research Scholars' Day is going to be celebrated on 23rd September, 2022. This event will give the research students and the faculty members a unique opportunity to share and exchange research ideas and to build a complete picture of the research activity carried out by the research scholars in the department. The event also provides the research scholars with a platform to publicly demonstrate their cultural aptitude. This year, these days will be observed with enthusiasm and zeal by our PhD, PG and UG students.

The event is envisaged to showcase the research pluralism of our Department that is kindled by numerous funded projects. Research scholars would take this opportunity to highlight the avenues explored by them to achieve the high-end research thereby fostering proliferation and dissemination among fellow researchers as well as encouraging aspiring researchers to be a

How To Reach

Durgapur is located around 170 Kms from Kolkata and is well connected by rail route and roadways. Once you reach Durgapur Railway station you may take a public transport to the Institute. One may also reach Durgapur by bus from Dharmatala, Kolkata. NIT Durgapur is 14 km away from Kazi Nazrul Islam Airport, Durgapur which is well connected to Delhi, Bengaluru, Chennai and Hyderabad.
