NIT Durgapur is a part of the erstwhile REC system where education and national integration were considered inseparable, with half the seats allocated to the students from the state while the rest were reserved for the students from other states. Seats are also reserved for students from backward communities as per the guidelines of the Government of India. The education system is holistic with equal importance being attached to academic as well as overall development of the students.

The Institute was granted academic autonomy in July 2003 and it awards its own degree. The Senate is the highest policy-making academic body of the Institute.

#### 1.4 New Initiatives

NIT Durgapur successfully participated in the World Bank-funded Technical Education Quality Improvement Programme (TEQIP) as a lead institute and improved its academic infrastructure and quality of human resources. Over the last few years NIT Durgapur gradually evolved from a teaching-centric institution to an institution focusing on both teaching and research. The faculty members were encouraged to intensify their research activities. This resulted in a rapid increase in research output, like publication in peer-reviewed journals and in being selected for sponsored projects. The Institute also initiated collaborative research programmes with esteemed research and academic institutions like CERN, Geneva, Caledonian College of Engineering, Oman, National University of Singapore, and many other academic institutions all over the world and industries like Durgapur Steel Plant. Internship was arranged for the undergraduate students in CERN, Geneva, Germany (DAAD programme) and NUS Singapore. New M. Tech. programmes in Biotechnology and Environmental Science and Technology and M.Sc. programmes in Physics, Chemistry and Mathematics with Computer Applications were also introduced. A number of seminars, conferences, workshops and short-term courses were organized and the faculty members were encouraged to visit premier institutions in India and abroad for participation in conferences, short-term courses and training programmes.

## 2.0 AN OVERVIEW

### 2.1 Historical Background

National Institute of Technology, Durgapur was established as one of the 17 Regional Engineering Colleges in 1960 as a joint venture of the Government of India and the Government of West Bengal and was registered under the Register of Societies Act. With introduction of cutting-edge technology in the emerging areas, the Institute maintained its momentum with definite mission and vision which enabled it to get the prestigious status of National Institute of Technology under full administrative and financial control of the Government of India with a “Deemed to be University” status with effect from July 03, 2003. The Institute has now been declared as an “Institute of National Importance” by the Govt. of India, vide NIT Act 2007 (29 of 2007) implemented on August 15, 2007.

It started with only four branches of engineering: Civil, Mechanical, Metallurgy, and Electrical Engineering for undergraduate studies in 1960. Chemical Engineering was started in 1964. At present, the Institute offers nine B. Tech. programmes and fifteen M. Tech. programmes, many of which are industry-oriented. Besides, a three-year MCA programme and two-year MBA programme are also offered. The Institute has also introduced M. Sc. programmes in Physics, Chemistry and Mathematics with Computer Applications.

### 2.2 Location

NIT Durgapur is located in the heartland of industrial activities and the mineral-rich region of West Bengal, also known as ‘The Ruhr of India’. The city of Durgapur is well connected by rail with Kolkata, 158 km away, and is an important railway station on the main New Delhi-Kolkata route. It is a two and a half hours’ drive from Kolkata airport along Durgapur Expressway and NH 2, and there is a military airport at Panagarh, only 20 km from Durgapur. The place is only an hour’s drive from Tagore’s Santiniketan and has quite a few tourist spots nearby. The climate is moderate.

### 2.3 Campus

The Institute campus, spreading over 187 acres, is known for its serene environment. Buildings housing the departments and laboratories, residential blocks for faculty and staff, students’ hostels are far outnumbered by the trees in the campus which is self-reliant with facilities like roads, water supply, power distribution network, a market complex, banks and post office.

### 2.4 Administration

NIT Durgapur is an autonomous institution under the Government of India since July 2003. As per MOA, the Institute is headed by a Director and administered by a Board of Governors. It also has Finance Committee and Building and Works Committee. In the Board, there are representatives from the Government of India, the Government of West Bengal, industries, other institutions, and the faculty.

## 2.8 Students

Seven hundred and seventy nine students were admitted in under graduate courses in the year 2010. Half of the students came from the state of West Bengal and rest of the students came from the other twenty seven states of India. In addition to the said figure, thirty nine students were admitted from foreign countries like Afganistan, Bangladesh, Bhutan, Maldives, Namibia, Nepal, Oman, Portugal, Qatar, Tanzania, Thailand.

The students find the environment of the Institute conducive not only to exercise their intellectual capability but also to learn living in cultural diversity and religious heterogeneity. In this era of free market economy India is a part of the global village, not confined to its territory that we see in text books of Geography. Our students researching in higher academic institutions and working in multinational companies have already made their marks in that global village.

In the year 2010-11, the students of under graduate and post graduate levels of the Institute has excelled not only in academics but also in every field one can think of. The NIT Durgapur is proud of producing the brains more than 90% of which gets employed by campus interview itself. Some of the alumni are in the higher ranks in the organisational hierarchy of the corporate sectors in Europe and the USA.

In 2010-11 four pre-final year students did the summer internship at CERN, Geneva and one student carried out collaborative M. Tech. programme with CERN, Geneva. Six students did internship in Germany, including DAAD and six students went to NUS, Singapore for internship. Altogether, 30 students participated in summer internship abroad in different universities including Massachusetts Institute of Technology, University of Michigan, Dearborn, ETH, Zurich, etc. Three students presented papers in international conferences abroad.

### Extracurricular Activities:

#### i. Centre for Cognitive Activities

CCA, the Centre for Cognitive Activities, is the focal point where convergence of all technical and scientific endeavours of the students materialises. As the technical gymkhana of the Institute, this club is a revolution which bridges the gap between knowledge and application. Bulk of the extracurricular activities held in the college all the year round are organised by the CCA, with the objective of probing the dark recesses of the human mind so that the grey cells are stimulated to create, conceptualise and

evolve, triggering a rebellion of the new age mind against baseless conventions and meek acceptance.

The ultimate focus of the CCA is the organisation of the annual techno-management fest of the Institute, AAROHAN, and to make it bigger and better with each passing year. In addition to this, CCA conducts various innovative events all through the year, to inculcate and unleash intuitive ideas and skills, guiding the students to create an environment to produce a quality resource pool. CCA provides the students, especially the newest entrants to the tech arena, a sound platform to test their strengths in various technical and scientific fields, aids them in their endeavours to achieve, and also helps them in preparing for life after college.

As the strongest link in this chain of technological advancement, CCA successfully organised the 8<sup>th</sup> edition of AAROHAN. Aarohan 2011 saw immense participation from all over the country with all leading institutes like the IITs, IIMs, etc participating. From down south to far west, Aarohan saw enthusiastic participation from all regions of the country. Breathtaking shows, branch specific events, invigorating guest lectures were the high points of the programme.

#### ii. **SAE- Society for Automotive Engineering (NIT Durgapur Chapter)**

SAE is a communion of students who have passion and vision in the field of automotive engineering and are bound with a common aim of making a mark in the automotive world. Club activities are held throughout the year that give the fresh talents in this Institute a place to hone their skills and master it too. The annual Auto fest of SAE students' chapter "*Motor Zundung*" was a hugely successful endeavour, complete with a number of innovative platforms. The SAE also organized a robotics workshop, '*Mobi Botics*' in association with IIT Delhi, *Emanagineer*, *AUTONEX* and IC engine workshop. The SAE team won the first prize in *Junkyard Wars* competition at IIT Guwahati in September 2010. The activities of *IEEE Students' Branch* include a Microcontroller based automation event "*Dig the change*", a circuit design event, an event for eco-friendly technical innovations called 'Eco-huts', summer workshop on Lab view and invited talks.

#### iii. **IEEE Students' Chapter**

The activities of *IEEE Students' chapter* include a Microcontroller based automation event "*Dig the change*", a circuit design event, an event for eco-friendly technical innovations called 'Eco-huts', summer workshop on Lab view and invited talks.

#### iv. **GNU/Linux Users' Group**

GNU/Linux Users' Group, NIT Durgapur was formed to popularise Linux and Open Source softwares beyond the silicon branches and to the masses in common. *GLUG* organized the annual National Technical Symposium *Mukti* which included events such as *Brainmesh*, the web designing contest, *InCanity*, the C programming contest, *Linquizitor*, the technical quiz, *ImaGIMP*, *Kaffeine Wars*, the Java programming contest, etc., which are all on Linux platforms using open source software. The other activities include various workshops, install fests and Codecracker (our online programming competition - designed and run by the students!). Also, our association with IOTA and the West Bengal Government strengthens our resolve to become the software backbone of the Institute and spread awareness about FOSS.

#### v. **Maths n Tech club**

The Maths 'N' Tech Club was formed in the year 2004 with the aim of promoting mathematics and technology among the students. The second edition of *Ank* was organized by *Maths 'N' Tech Club* during September 03-05, 2010 with resplendent reception and massive participation. Other annual events of the club include *Hourglass*, *War of the Branches*, *Darwinia* (at Aarohan), *Media Cryptex Booth* (at *Mukti*) and Sudoku championships.

#### vi. **Music Club**

The Music Club is a haven for all music lovers of the college. The club organises several musical events throughout the year. The members participate in the cultural festivals of various colleges. The Music Club conducted *NIT Idol*, a solo singing competition, and *Rockophonix*, a band

competition during *RECSTACY 2010*. In *Ank 2010 Quiztune*, a fun-filled musical quiz was organized.

#### **vii. Chayanika**

### 4.8 Awards

The details of the awards received by the students and the faculty are given in Annexure 11.9(b).

### 4.9 Examination Details

Written examinations are held at the end semester (3 hour duration) for the theory papers. Question papers are set internally and moderated by the respective Departmental Academic Committee (DAC). The Institute provides central arrangements for B. Tech. examinations. The postgraduate

examinations are being conducted by the respective departments from the academic year 2008-09, with partial support from the Institute, whenever necessary. The students are also continuously assessed through class tests, viva-voce, and class attendance. For the laboratory and sessional classes, the assessments are continuous and supported by viva-voce test /examination at the end of the semester. The methods of the evaluation systems on such assessments are given below.

### **SGPA- CGPA System**

All the subjects in a semester carry credit units depending on the contact hours per week and nature (lecture/ tutorial/ sessional/ laboratory) of the class. The full marks for all the subjects both theoretical and sessional/laboratory are 100. The percentage mark of a theoretical subject consists of 30% by continuous assessment, and 70% through end semester examination. The total marks obtained in a subject are converted to appropriate letter grade by the departmental academic committee (DAC) and despatched for result compilation. In general, the number to grade conversion and the corresponding grade value is as follows:

|                               |                      |
|-------------------------------|----------------------|
| 90 and above: <b>Ex</b> (10); | 80-89: <b>A</b> (9); |
| 70-79: <b>B</b> (8);          | 60-69: <b>C</b> (7); |
| 50-59: <b>D</b> (6);          | 40-49: <b>P</b> (5). |

Below 40 in theory subject or below 50 in sessional/ laboratory: F (0); Absent: X (0).

The product of the grade value and the credit unit of that particular subject is the grade point earned by the student in that subject. The total grade point (TGP) is the summation of all such grade points. Semester grade point average (**SGPA**) = (TGP) / Total credit unit of the semester, rounded off to the second place of decimal. If the candidate clears all the subjects, his SGPA is marked passed in the grade sheet, otherwise marked supplementary. Such candidates are allowed to appear in the supplementary examinations of the subjects in which they have failed. Fresh grade sheet is issued for such candidates with improved SGPA. The grade obtained by the candidate in the subjects for which he/she had appeared for the supplementary examination are decreased by one step at the time of compilation of the supplementary examination results. Unsuccessful candidates in the supplementary examination are required to repeat the semester through readmission. Two such readmissions are permitted in the whole undergraduate studentship. The CGPA is also indicated in the grade sheet, which is the indicator of the student's continuing performance given by the ratio of **the total grade point scored** by the student up to the current semester and **the total credit unit of all the subjects** up to the current semester. Based on the CGPA at the end of the final semester the classes awarded are as follows: **CGPA ≥ 8.00** *First class with Distinction*; **8.00 > CGPA ≥ 6.50** *First class*; the rest of the passed candidates get *Second class*.

Similar system is followed for the M. Tech., MBA, MCA and M.Sc. courses. In some special project-based courses in MBA, the 70/30 ratio as indicated above is changed according to need.

The results of the end semester examinations (both undergraduate and postgraduate) are compiled centrally by the Examination Cell.

## **4.10 Training and Placement**

The Institute provides industrial training and placement to the students through the Department of Training, Placement, and Students' Welfare. The students are given an insight of the corporate industry via various vocational training programmes facilitated by the department. The department believes that such an insight is quite crucial and helps the students in understanding the professional aspects along with the technical details of their probable future jobs. Along with training sessions (ranging between 3 to 5 weeks), the department also organises plant visits to various organizations in and around Durgapur. Apart from providing industrial training, the department also helps the students in preparing for campus recruitment drives by developing their communication and interpersonal skills through certain development programmes, which include conducting mock group interviews. It also takes care of inviting reputed firms from all over to hire students through their campus recruitment drives.

**Annexure-11.14 Alumni**

NIT Durgapur Alumni Association (NITDAA) was formed in 2002 at the behest of the Board of Governors, RECD. Since then, NITDAA has spread its wings all over the world – setting up Chapters in USA (three); UK; UAE, apart from various cities and towns in the country. It is closely associated with the development of the Institute. It has instituted Prof S.N. Ray Scholarship for eight students per year. It has extended financial assistance to four students for foreign internship. In order to have close relationship with the present students, NITDAA has contributed to programmes like Arohan, RECSTACY and 'Maths' N Tech Club' and actively participated in all these programmes.

NITDAA celebrated Golden Jubilee programmes of the Institute in Kolkata on June 26, 2010 and in Atlantic City, USA on July 10, 2010.
