Royal Panda is a fairly new online casino, yet it managed to become popular in a relatively short amount of time. I discovered this casino quickly after it was established in 2014 and I am quite happy with the gaming experience so far. In this review you will find a lot of useful information that I've learnt whilst playing at this casino and the stuff I've read online. I'll tell you all you need to know about the game selection, including the wagering limits and return to player percentages.

In the concluding paragraph I'll tell you what I think of this casino overall. There's also a smaller paragraph where I rate this casino's bonus offer. On this website you will also find separate reviews regarding Royal Panda Live Casino, as well as its mobile version.

## **Casino royal panda online canadian**

For a majority of players, game selection is what matters most when it comes to online casinos. That's essentially what we all look for in a casino, we expect it to feature interesting and thrilling games. I generally rate quality over quantity, but I don't consider the total number of games to be totally irrelevant. In this paragraph I will tell you everything you need to know about the game library at Royal Panda.

The total number of games at Royal Panda is pretty good, especially since the casino was established only two years ago. There's over 600 different casino games that are offered. Almost 90% of the games, 562 of them are slots. This is one of the reasons why Royal Panda ranks among the best online casinos for Canadian players. Being a huge fan of slots, I always like variety. More importantly, the games offered here are of high quality. 25 of the games feature progressive jackpots. In addition to slots, players are also able to choose from a range of 22 different roulette games, 44 blackjacks and 26 other table games, such as baccarat, Punto Banco and Caribbean Stud Poker. In addition, you will also find 12 video poker games, four scratch cards and eight arcade games. It is difficult for me to select only few slot games, as I fancy plenty of the games that are offered at this casino. Still, I have got a few favourites. Jimi Hendrix is a slot game based on the character one the man who I, as well as thousands of others, consider to be the best guitar player in history. But I also like mythology and that's why Medusa II is one of my favourite games. This popular slot has five reels and 243 pay-lines.

## **Panda royal casino canadian online**

I haven't yet won a major progressive jackpot, but that doesn't mean I'll stop trying. It is pretty difficult not to get excited, as some of the prizes go well into seven digits. Some of my favourite jackpot games offered at Royal Panda include: Mega Moolah, Mega Fortune and Hall of Gods. Mega Moolah is definitely one of the most popular progressive jackpots and one fortunate British soldier from Cheshire won a staggering amount of £13.2 million (that's over \$22.5 million Canadian) in 2015. The current Mega Moolah Jackpot exceeds \$7 million, whereas the total amount of jackpots offered at the casino is over \$30 million. The fact that I love slots the most, doesn't mean that I don't enjoy playing other casino games. When it comes to roulette, French is my first choice, but I also enjoy a spin on the Multi-Wheel game. As for blackjack, I like classic and Single Deck. All major video poker variants like Aces and Faces and Tens or Better are also available. Beer Fest is the name of the most popular arcade

game. Who doesn't like beer, right? All in all, this casino has a pretty solid game selection.

Live Casino is as authentic and as realistic an online casino experience can get. The live casino section at Royal Panda is powered by Evolution Gaming and it includes Blackjack, Roulette, Baccarat, Three Card Poker, as well as Casino Hold'em. If you like to know all the details concerning it, I suggest you read the special live casino review featured on this website.

## **Panda casino canadian royal online**

When it comes to the mobile casino offer, Royal Panda is doing pretty well. Over 170 mobile games are offered, including, of course, slots, roulette, blackjack and even live casino games. Again, this website features a special mobile casino review of this casino, so I'd suggest you have a look at it, if you want to know more.

Wagering limits are quite important as they can tell us whether a casino is suited for our playing style and bankroll size or not. Royal Panda offers pretty wide limit margins, which means that it is suited both for experienced players with 'thicker wallets', as well as for novices. When it comes to slot games, they can be played for as little as one penny, but players can also wager up to two hundred quid on selected fruities. Roulette can be played with a bet as low as 0.10 but on some variants the minimum amount may be up to \$50. The maximum limits may also vary, starting from \$5,000 and up to an amazing \$75,000. The limits on blackjack games are quite similar. You can play a game of blackjack for a minimum of 0.10, but the minimum amount on some versions may reach up to \$50. As for the maximum amount, it may also vary from only \$5 and up to \$3,000. If you're playing arcade games or video poker, the limits may vary from 0.10-0.60 for the minimum amount and between \$24 and \$65.50 for the maximum. Generally speaking, regardless of your bankroll size, you will be able to find the games with appropriate betting limits that'll suit your style accordingly.

Speaking of wagering limits and money, let's admit it, we all dream of winning a big jackpot one day. Essentially, the hope of every player is to win an amount at least several, if not several hundred times higher the amount s/he has wagered. And the RTP (return to player) percentages tell us what chances we have of winning at a particular casino. Higher RTPs means better winning chances for us. RTP percentages are calculated per each game category individually and that's why they are usually given as a range that may vary between few percentage points or less. The RTP for classic slot games at Royal Panda is between 95.60% and 97.60% percent. This is a quite high RTP percentage for slot games. When it comes to Video slots, the RTP is starting at 95.25% and may go up to 98.60%. Again, this is a pretty high percentage.

When it comes to other games, roulette has an RTP between 94.74% and 97.30%. The difference in the RTP for roulette is attributed to the fact that different variants have different house edge. For example, American Roulette has smaller RTP due to the fact that it features a second zero. The RTP for blackjack is usually pretty high and here it varies from 98.37% up to 99.64%. Other table games also have quite high RTP, ranging from 97.34% up to 99.37%. Video poker also has a low RTP figure that exceeds 97- 97.95% and the high figure is calculated at 99.56%. Scratch cards and arcade games have significantly lower RTP, with lower figures at 85% and 84% and high RTP rates at 87.50% and 88.50% respectively. The overall average RTP at this casino is 94.77%. Generally speaking the numbers are quite positive as only the values for scratch and arcade games are lower than 90%, whereas for some games the RTP may be even higher than 99%.

Royal Panda's website is quite user-friendly and most of the games feature high-quality graphics, animations and sound effects. It is very easy to navigate through the casino and find what you need. The website is available in multiple languages, including English, German, Dutch, Spanish and

Chinese. The games are neatly divided into several categories and you'll even find a 'Hot and cold slots' feature, where you can select a time frame and an amount of money and the website will tell you which slot games have paid out amounts equal or greater in the selected period (hot) and which ones haven't (cold). I find this to be very useful. Another feature I really like about Royal Panda is the split-screen which allows you to play up to four games at once.

This casino also features games from several game developers such as NetEnt, Evolution Gaming and Microgaming, among others. Getting to choose from a selection of games developed by different companies is really refreshing. I will mention only few of the more popular games, other than the ones I already talked about. Jack and the Beanstalk is a five reel, 20 pay-line NetEnt slot based on one of the most popular British tales for children. I really fancy the high-quality animations featured in this game. This slot has an RTP of 96.3%. Pistoleras is a Microgaming slot that is based on a Wild West theme, featuring three fit señoritas. The game has five reels and 25 pay-lines and players can win up to 25 free spins.

You won't have to download any files in order to play games at this casino. You only need to register and open an account if you want to make deposits and play for real money. And if you want to play for fun, you can simply visit the website and click on 'Play for fun'. A demo version of the selected game will be quickly prompted. The website has a great design and it is quite modern. You'll only need the latest Flash Player if you want the games to load. The loading periods may be longer for some games, but they generally depend on the speed of your internet connection.

Information regarding the company which owns and operates a casino, as well as details concerning safety, as well as the utilisation of security protocols which are employed to protect vital data provided by the players in the process of registering and making deposits are very important and can be a pretty safe indicator of how reliable a casino is. It is also important whether a casino possesses all necessary licences and how helpful and friendly their customer support team is. All of the above will be discussed in this paragraph.

## **Panda online royal canadian casino**

As of October 2017, Royal Panda is owned and operated by LeoVegas. The Swedish online casino giant bought the Royal Panda brand for an initial €60m (\$91m). Despite the fact that Royal Panda was relatively new and didn't have as much experience as some of the other operators, its honest approach and level of protection that it provides managed to win the hearts of many casino players and prompted LeoVegas to stump up big cash to acquire it. I feel obliged to mention the fact that players coming from Denmark, United States, Turkey, France, Spain, Italy, Israel, Singapore and Belgium are not accepted at this casino.

I've already told you about the website and let me just add that includes an FAQ section, where you'll find a lot of useful information concerning questions you may have. However, if you have an issue that is very specific, you can't find an answer in the FAQs, or you simply want to be 100% sure about something, you can contact Royal Panda's helpful and friendly customer support team. The best way is to phone them directly on 00356-2778-0418 any time from 8 in the morning up to 11.30 at night. Alternatively, you can email them, or contact a member of staff via live chat or contact form, both of which are available directly via the website.

As a company located in Malta, it is hardly surprising that the owners of Royal Panda have a valid licence issued by the authorities of this island country. As you're probably well aware, according to Canadian laws and regulations, every company that provides casino gaming services to Canadian citizens is legally obliged to obtain a valid licence. These licences are often issued by the UK Gambling Commission. Royal Panda Ltd owns the UK licence number 000-039221-R-319351-004. eCOGRA (e-Commerce Online Gaming Regulation and Assurance) is an independent organisation that conducts tests of online casino software, thus determining the individual and average RTP of particular casinos. Moreover, they also provide dispute resolutions for players playing at licensed online casinos.

Online security is an issue of utmost importance when it comes to online casino gaming. Whenever personal information is provided to an online source there's a risk that the information might be obtained by third parties and later misused. Therefore, measures need to be taken in order to prevent that. In terms of protection, this casino employs a 256-bit encryption as well as a TLS 1.2 RSA key which ensures that all your data will be encrypted and thus it'll be virtually impossible for hackers to obtain it. IT security is provided by Comodo, a very reliable internet security suite, developed by Comodo Group.

## **Panda casino canadian online royal**

Another factor when it comes to security is often neglected, but is equally important. Namely, some people have to be protected from the damage that they can cause on themselves with their behaviour and online casino gaming habits. Therefore, at this casino it is possible to protect yourself by setting deposit limits and activity limitations. That way, you won't be able to deposit and wager more than you can afford to lose. Limits can be placed on the amounts that you can wager per session, per single bet, per deposit and also a limit which activates after you lose a specific amount of money. Furthermore, it is also possible to self-exclude yourself from the casino over a certain period of time. Protection of minors is guaranteed and people under 18 (or appropriate legal age if it's not 18) are not allowed to play. This operator cooperates with GamCare in order to combat problem gambling.

I know how important bonuses are for players. Nothing encourages me to come back to a casino like a hefty bonus, or an exciting new promotion. This casino hasn't won any awards yet because it is still quite new, so I haven't given them any points for that. However, a range of promotions are offered, including a weekly Bamboo Bonus, a special Lucky 21 on Blackjack games, as well as a Fool Moon Bonus. I've given them 3 out of 3 for Promotions.

## **Royal online canadian casino panda**

Starburst is a very popular arcade game that was developed by NetEnt. The casino offers a 10 Free Spins Bonus on this game, and you are entitled to it before even making your first deposit. It is definitely enough for a 1 Special Games point out of possible 2. This casino features a great Loyalty Scheme. With each wager players collect LP points which can be later redeemed for amazing gifts such as: jewellery, tablets and bonus money. It features 4 Loyalty Levels: Bronze, Silver, Gold and Diamond. I've also awarded this casino 1 Extra point for their Free Spins extra bonus. In total, the bonus offer is quite lucrative and this casino received 6 out of 10 points.

I would definitely recommend Royal Panda, especially if you're looking for a casino with a solid game library. Moreover, their match Welcome Bonus of up to \$100 and the 10 Free Spins, plus some other interesting promotion make this casino sound even more appealing. I have already mentioned the attractive website design, which is definitely another asset that would attract players. The 'Split-screen' feature and the 'Hot and cold slot feature' really give Royal Panda a unique character and image. This casino offers a lot of things that can't be found elsewhere.

## **Online canadian casino panda royal**

Of course, my goal is not to praise a casino uncritically, but rather to provide a fair and balanced review of this casino. Therefore I will have to mention that I considered the fact that it doesn't provide 24/7 customer support to be a minor flaw of this casino, especially as there are other casinos which do that. If you're looking for an operator that has better customer support, I would recommend Betway Casino. Despite the fact that Royal Panda provides solid bonuses and promotions, I have to admit that 888casino has a better bonus offer. I would also have preferred a higher number of slot games. If you're interested in a casino which has a much higher number of slot games, I would highly recommend Casumo.
