## Slotomania game questions

Have been playing Slotomania™ for years now. Then suddenly about a week ago, it decided not to let me download the game. Keeps flicking me off. Have not been able to download and play since. Very disappointed. I will keep it for another week, but will delete if I cannot get access to be able to play. Very frustrating, as before this, I enjoyed the 'game'. □□□□□□. December 2021. When I tried to redeem my 'wheel' bonus, it would not download. It has now been about 4 hrs, and still giving me the circular download icon. As it is meant to be hourly bonus, am not sure what is happening. It has frozen, and I can't even 'dump' it, and keep playing. Please help. From Australia □□□□.have tried : cancelling game, but on return same thing. Reset the iPad, no difference. Left it for a couple hours, no change. Please help. Addit: just reopened the app, and it is now working. Just lost several hours of bonuses, but at least I can play. What happened, and why was it necessary to go to this extreme (losing several hours of bonuses) before I stumbled on a remedy. Is there another way of correcting it? Thank you. For the second night in a row, I am unable to play, receive bonuses or even purchase coin. Telling me I am off line, which is incorrect. Again, losing any benefits on offer. Not happy at all with your product. I will again reopen the app, but would prefer not to have to on a daily basis! □□

## Slotomania game time to cash

Starting with the bonus, you can gain 1,000,000 free coins to get you started as you indulge yourself into the games at Slotomania.

Like I said in the title, it's a fun game with lots of different side games to play. But in all if you live in a part of the world where Gambling is legal, stick to gambling real money for real money pay outs. I have been a player of 888 casino for over 6 years and to be honest the algorithm is built exactly the same, once the computer knows your up it takes, takes, takes, until you purchase more coin/money. Remember every Cent/Penny you pay into this app there is no real return. I have been playing on this app for about a month now and put no real cash into the game, even with the 20 ads I see for spending real money a day, the most I have ever won after hard graft was 500,000,000 and as soon as the Algorithm kicked in it's no bonus or hard wins for the rest of my games, was at 500,000,000 now at 100,000,000 and falling. Like I said it's fun but if you spend real money on this app you might as well use that money and gamble it legally, at least there is a small chance for you to make a return on your hard working cash. Hope this was helpful.

Hello. We apologize for the delayed response. We were in the process of updating our support platform. The outcomes in a Slots game are designed to be random. You could either win or drop your balance. It all depends on the machine you choose, the strategy you use, the bets you place coupled with how luck favors you. Wish you a wonderful day!

I like the new changes, there are still a few more things that could be improved.. like how much your sloto points are worth when u have a double pass... they should be worth a lot more than what they are. I love the live chat to help out players. On the whole most support people are helpful. Overall the game is fun, the rewards have got a bit better this year and things are more affordable if you like to buy. I do think that If you make any purchase at all then your 'collect all' button should be unlocked for the rest of the year! Seven days is ridiculous, any other game and it would be open for life. The sloto clans are a great feature, earning badges for different rewards every few days is great. I dislike that a newer player gets Ace cards constantly in ace rooms betting sooo low, where a loyal player who has a higher level and bets higher barely ever gets one... that definitely needs to change. It is a bit silly to make the game more impossible the higher you get, I would think rewarding loyal players would make you more money? Just a thought.

I have been playing this game for a very long time hence my level of 6542. This used to be my favourite game as you can see, but in the last couple of years your payouts have dropped ridiculously. I love the games and I really love the quests but even they are too hard to win on now. I spend most of my time collecting bonus just to have something to play with because your games don't pay out enough. You charge way too much money to buy credits, many people can't afford what you're asking for a game with no monetary return. You ask for our reviews and when we do our win rate seem to drop. I have left a few good reviews on here with no reward. I have read the reviews others have left and we are all saying the same thing so surely you would be thinking to yourself that something is wrong and we are losing players so how do we fix this... instead of thinking about how you can make people spend more money think about how you can keep your players. When I was getting a good return on my games I would play for hours now I'm lucky if I got to play for half an hour. So disappointed that no one is listening to the people who pay your wages and keep your site running. My suggestion is to keep your players happy or you won't have any left. I know my win rate will be non-existent now that I have put up this review but so be it. There are plenty of other sites that actually listen to their players.

Hello, sorry you feel this way about the game. I'm sure you know that slots is a game of luck, sometimes you win and sometimes you lose. ## **Slotomania game in france**

I have been playing Slotomania for years. When it first started, i would play about every other day, the slots were more simple, but it was fun and you were able to keep playing for while. Then, the game added more extra features over time, along with a lot more advertising and ways to entice you to spend real-world money. I almost stopped playing it and actually deleted it about a year ago. But i friends who play and loaded it back so i could send them points. Lately though, i've noticed slotomania has made changes, there are still lots of ads, but there are not as many that pop up and interrupt you, slotoquest with the star system was much less annoying and didnt force you to play a cold slot to move forward, and there seem to be more times when more slots have their win percentage increased - kudos to Playtika for listening to its customers to make improvements.

Suggestion - add at least 3 slots at each point in the path in slotquest so we dont get stuck on a forever cold slot like mighty bronc (you can remove that one from your lineup and I would be happy) because having to blow billions of points on a slot that that is paying out at 5% is truly not fun. . . just aggravating. Thank you for improving your game, I am playing it almost every night now and mostly having fun. Ive event sent you guys a few dollars here and there when i have a little extra disposable income. Keep improving.
