Is your Epson Printer Red Light Blinking and showing the error message "Service Required"? Reset or fix quickly the Red Light Blinking one by one problem of Epson L380, L383, L385, L485 InkTank Printer within a few minutes. No Keygen, No Paid Tool, No Authorised Service Engineer needed it's Free. Download Epson L380 Resetter or Adjustment Program zip/rar file from our site and fix it yourself at your home or office. (My Secret Method) The EPSON L380 InkTank printer is the most popular in the market. It can deliver a massive amount of print pages at minimum printing cost. But after the print of a vast page, it shows a notice "Service Required." If your Epson L380 printer has stopped to printing, Two Red LEDs are blinking one by one, and the Green Power button Light is stable. On the other hand, a red color error notification window (Service Required) appears on your computer screen when you try to print. You don't need to visit another website, and here is the right place because here we discuss the solution. Follow the steps one by one given below, and you will be able to fix this problem with a 100% Guarantee. So, Bookmark this website first. Download Some Other Resetters: First, you have to identify the Exact Problem with your EPSON L380 printer. If you are a non-technical person, please read the above information carefully, and follow the image and video. After identifying the problem, you have to download a tool named "Epson L380 Resetter or Adjustment Program." We have provided it for you free of cost. So, please find the Download button and get it. It can run only on a Windows-based PC or Laptop. Follow the below some easy steps, and you will be able to reset your Epson L380, L383, L385, L485 printer. After downloading the zip/rar file from the download button on our website, it's recommended to disable your antivirus software for a while. Extract the zip or rar file in the same location if needed; password checks below the download button. If you cannot unzip it correctly, please update the software or directly download it from here. After unzipping the downloaded file, open the folder, find the "Run-ME" exe file and run it. Don't touch the other files like Adjprog and AdjProg\_L380. After clicking the "Run-ME" file, a window will appear on the screen. Just click on the "OK" button, don't touch other options. You have to click on the "Select" Button in this step. Don't touch other options. After clicking on the "Select" Button, another will appear in front of you. Choose your printer model (L380) from the drop-down menu. Leave 'Port' as it is, then click 'OK.' You have to click on the "Particular adjustment mode" button in this step. Find and select the "Waste ink pad counter" option in this window and click on the "OK" button. After clicking on the "OK" button, another window will appear on the screen. First, you have to tick on the "Main pad counter" tick box on this screen. After that, click on the "Check" button, showing that Inkpad is 100% full. Again Tick on the Main pad counter and check the "Initialize" button. After clicking the "Initialize" button, the EPSON L380 printer will initialize within the second and show a notice "Please turn off the printer." So, Power OFF the printer and Power ON it again. You have done the job. You have successfully utilized the Epson L380 resetter or Adjustment Program tool. Your EPSON Printer is now ready to serve print again. After Resetting the Epson printer, it is recommended to clean or replace the InkPad; otherwise, the ink will overflow, and it causes damage to your Printer. Option 1: You can fill with Tissue, Cotton Pads, Diapers, etc., in the waste ink pad. Option 2: waste ink pad is available in Online Market like Amazon, AliExpress, etc. You can order from these sites. Option 3: You can Replace from EPSON Authorised Service Center. Below we have mentioned the indications you can understand by looking at, you have to reset your EPSON L380 printer. Its Red LED lights are flashing one by one, but Green Power Led is still on? Have it says, "Printer's ink pad at the end of its service life?" Does it notify you about going to the Epson Service Center? Showing message about Epson L380 Inkpad needs to change? There are many reasons for this problem. During the cleaning of the printer head, it generates waste ink. These pads absorbed this type of waste ink; when Waste Ink Pads Nearly overflowed, the Epson L380 printer stopped working automatically.
